

Regional ecosystems

30

Connected through the activities of the 3DP pilot, framing a proper **cross-regional innovation valley** in the field of 3DP.

These ecosystems are now structurally better connected through our tools and activities, enabling the effective implementation of various strategic industry-led projects, such as the **3DP Gateway**.

Sign up
to the 3DP
Gateway!

The VI 3DP Pilot developed a sustainable matchmaking tool for our members, the **3DP Gateway**, for **24/7 connections across borders**.

€11+

Million grants

For SMEs-led demonstration activities with **20+** SMEs directly supported.

Among those, the recently kicked-off **I3 3DoP project** will substantially impact the deployment of 3D printing in Europe, **addressing key bottlenecks like costs, quality, and automatization of 3DP production!**

The VI 3DP Pilot substantially contributed to the emergence of new **pan-EU support to 3DP**: contributing to the design of the **I3 instrument**, enabling the **generation and implementation of the 3DP Pan EU project**.

As a result, VI 3DP Pilot is enabling the development, deployment, and uptake of **SMEs-developed solutions in various areas** (automotive, tooling, healthcare, etc.)
